

RESEARCH GRANTS PROVIDED BY INQUIRE EUROPE

The Institute for Quantitative Research (INQUIRE) in Europe provides financial support for academic research projects with potential applications in the field of investment management. Several grants of € 10.000 a piece are awarded each year. Payments are made directly to the researcher, unless otherwise requested. Support of a research project by Inquire Europe does not in any way preclude subsequent publication of the paper in a journal of the researcher's choice. Completed papers may be invited for presentation at the INQUIRE's spring or fall Seminars. INQUIRE will pay the researcher's reasonable expenses incurred in connection with the seminar.

The next deadline for submission of research proposals is Monday 11 February 2008. More information on Inquire Europe, on research grants that have been provided in the past and on the application procedure is available on INQUIRE's web site: www.inquire-europe.org.
